

WEBCALCS® SOFTWARE

WebCalcs® Financial Calculators

Torrid Technologies has been a leader in Internet financial planning since 1994 when we put online our first website. As the first company to offer Internet-based retirement planning, social security benefits estimation, risk and asset allocation, historical hypothetical modules, we are a proven innovator that continues to offer new systems at a rapid pace. Our **WebCalcs®** planning and analysis tools are designed to help individuals execute better financial, investing, and retirement savings strategies. Leading financial institutions use our **WebCalcs®** Internet calculators to gather and retain assets, as well as educate and support their customers.

WebCalcs® are Internet delivered financial applications branded to match our customers' websites. **WebCalcs®** can be seen in action today at leading financial services companies including JANUS, MFS, AXA/MONY, Sentry Insurance, Pacific Life, and Zurich-Scudder Investor Services.

We provide over forty **WebCalcs®** applications that support life's most important financial decisions including retirement planning, investing, home purchasing, college savings, budgeting and more. Some of our more sophisticated financial analysis programs include Roth IRA Income and Tax Analysis, RMD/72t/Stretch Distribution Planning, Mutual Fund Hypotheticals, Annuity Income Analysis, Risk Tolerance Profiling, Portfolio Optimization, and Asset Allocation. New **WebCalcs®** applications are always under development and our latest information can be found at:
